

**Flowserve
Corporation
Vernon, CA**

Inspector

Job Description

Performance Standards:

- Responsible for dimensional acceptance of close tolerance machined and finished hardware items.
 - Required knowledge of ANSI Y 14.5, dimensional and visual inspections (NDE support a plus - liquid penetrant, UT, etc).
- Basic Computer skills and familiarity with supporting software such as Microsoft Windows.

Qualifications & Required Competencies:

- Inspect supplier materials, in-process and/or finished production assemblies and sub-assemblies for conformance to quality standards.
- Ability to work from blue prints, engineering change notices, and established operating procedures, and determine acceptance, rejection, or rework requirements of units.
- Must be proficient at drawing interpretation.
- Five years experience with inspection processes as it relates to quality control activities for manufacturing and inspection methods and devices.
- Must be well versed in the requirement of ANSI Y 14.5.
- Must have a basic understanding of nondestructive testing done in accordance with ASME Code Sections V.
- Should be familiar with flatness measurements using an Optical Flat.
- Candidates that have a working knowledge of ASME Code are preferred.
- Auditing experience in accordance with ASME Code requirements is preferred.
- Proficient in basic computer skills including Windows and Lotus Notes.
